Education

University of Florida - Gainesville, FL

May 2028

Bachelor of Science in Computer Science

GPA: 3.59

- Relevant Coursework: Data Structures & Algorithms, Computer Organization, Operating Systems, Discrete Structures

Projects

ReactorLab — Self-Hosted Developer Cloud [GitHub](#) | [Site](#)

August 2026 - Present

Go, Docker, PostgreSQL, Ollama, Cloudflare, Linux

- Built ReactorLab with MiniDeploy for application deployment, MiniBase for PostgreSQL provisioning, and MiniAI for local infrastructure diagnostics and troubleshooting
- Operate 6 deployments across 8 Docker containers and 2 PostgreSQL databases on an Ubuntu server with health monitoring, deployment history, and centralized service management
- Secured public and administrative services with Cloudflare Access, loopback-only origins, firewall rules, and server-side access controls

MyScheduler [GitHub](#) | [Site](#)

August 2026

React, Node.js, Express, MongoDB, Vercel, Render

- Developed a full-stack workforce scheduling application for a client that generates employee shifts based on availability, staffing requirements, role qualifications, and weekly hour limits
- Engineered constraint-aware scheduling logic to prevent split shifts and scheduling conflicts, preserve role-qualified employees, and balance employee workloads

Golf Mullet [GitHub](#) | [Site](#)

January 2025 – August 2026

React, Node.js, Express, MongoDB, Vercel, Render

- Developed and deployed a production e-commerce application for a client, translating business requirements into product browsing, search, favorites, cart, account, and authentication workflows
- Engineered REST APIs and MongoDB data models for products and user accounts, implementing JWT authentication, password hashing, and persistent user functionality across the application

Experience

Senior Developer — UF Software Engineering Club

August 2026 – Present

- Developed an administrative content-management system with role-based access control, enabling club leadership to manage website content without modifying source code
- Refactored hardcoded website content into database-backed models and CRUD workflows, collaborating with club leadership to define requirements and improve maintainability

Skills

- Languages: Go, Python, C++, JavaScript, TypeScript, SQL
- Frameworks/Libraries: React, Node.js, Express, Django, Tailwind CSS
- Technologies: PostgreSQL, MongoDB, Docker, Git, GitHub, Linux, Cloudflare, Ollama
